

DRYOUT™

PROTECT AND RESCUE SENSITIVE EQUIPMENT FROM EXPOSURE TO MOISTURE

DRYOUT™ PROTECTS AND RESCUES FROM MOISTURE DAMAGE

Alternatives - such as rice or silica gel packets or canisters - do neither.

EXAMPLES OF CUSTOM SOLUTIONS ENGINEERED WITH DRYOUT™

- pouches for smartphones, battery packs, tablets
- liner sheets for hard cases for firearms, photo/video gear, etc.
- bags for helmets, laptops, gear.
- cases for comms gear, optics, etc.

We supply directly to military/government and work with OEMs and suppliers.

Moisture poses a real threat to electronics, firearms, and tactical gear — causing costly damage and putting warfighters at risk.

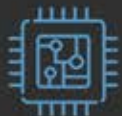

Rust

Corrosion

Condensation

Shorted Circuits

PATENTED **DRYOUT™** TECHNOLOGY

HOW IT WORKS

Moisture-Wicking

Moisture - inside and outside - is drawn from the hard good into moisture-wicking nylon.

Water and Moisture Protection

Moisture - inside and outside - is drawn from the hard good into moisture-wicking nylon.

Dry and Re-Use

Works without batteries or electricity and is designed for repeated use.

Trap and Release

The embedded superabsorbent technology traps and holds onto the moisture until it evaporates.
