

# KEEP ELECTRONICS SAFE AND DRY

The only patented advanced material with moisture removal technology that rescues electronics and gear from moisture damage.

**GOES IN WET.  
COMES OUT DRY®**

DUAL BENEFITS

**RESCUE**

+

**PROTECT**

## Moisture-Wicking

Moisture - inside or outside - is drawn from the object into moisture-wicking nylon.

## Water and Moisture Protection

Objects are protected from damage or corrosion that occurs after exposure to moisture.

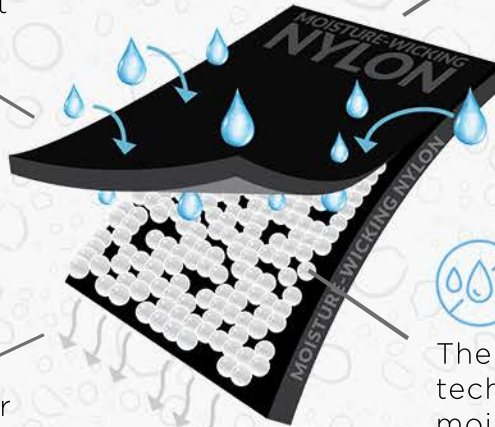

## Dry and Re-Use

Works without batteries or electricity and is designed for repeated use.

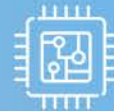

## Trap and Release

The embedded superabsorbent technology traps and holds onto the moisture until it safely evaporates.

Moisture poses a real threat to customer electronics and causes billions in damage.

Shorted Circuits

Corrosion

Condensation

Rust
